Disclaimer

This Presentation (the "Presentation") has been prepared by Novarin Capital (the "Company") for information purposes only and is proprietary to the Company. Its contents, including all text, graphics, charts, images, registered and unregistered trade marks (including the Company's registered Novarin Capital logo), logos, branding and other intellectual property, are protected by copyright, trade mark and other intellectual property laws. This Presentation, or any part of it (including individual slides, extracts, excerpts, screenshots or other reproductions), may not be copied, reproduced, published, distributed, disclosed, adapted, transmitted or otherwise used, in whole or in part, without the Company's prior written consent. The Company's name, registered and unregistered trade marks, logos and branding may not be copied, reproduced, displayed, extracted or used separately from this Presentation, or in any manner that implies any affiliation, endorsement or approval by the Company. Any unauthorised extraction, reproduction or use of material from this Presentation, including in presentations, websites, social media, digital communications or other publications, is prohibited, including (without limitation) any use in isolation, out of context, or in any manner liable to misrepresent the Company's business, strategy, communications, regulatory disclosures or commercial relationships.

This Presentation does not constitute, and should not be construed as, an offer to sell, issue or subscribe for, or the solicitation of an offer to buy or subscribe for, any securities or other investment. It does not constitute a prospectus, admission document, offering memorandum or financial promotion approved by an authorised person for the purposes of section 21 of the Financial Services and Markets Act 2000 ("FSMA").

This Presentation is directed only at persons to whom it may lawfully be communicated, including persons falling within applicable exemptions under the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005, as amended. Any person who is not a relevant permitted recipient should not act or rely on this Presentation.

The contents of this Presentation are not intended to constitute legal, financial, tax, accounting, investment or other professional advice. Recipients should make their own independent assessment of the Company and should obtain independent professional advice before making any investment decision.

Any investment in securities involves risk. The value of investments may go down as well as up and investors may lose all or part of the amount invested. Past performance is not a reliable indicator of future performance.

The Company maintains a strategic digital asset treasury as part of its broader capital allocation strategy. Investors should be aware that the UK Financial Conduct Authority ("FCA") regards cryptoassets as high-risk and speculative investments that are subject to significant volatility and that investors should be prepared to lose all the money they invest. Digital assets, including but not limited to Bitcoin, are subject to extreme price volatility and may be affected by market, regulatory, liquidity, custody, technological and other risks. Further information regarding these and other risks associated with the Company's digital asset treasury strategy is set out in the Company's Bitcoin Treasury Risk Statement, which should be read in conjunction with this Presentation, available at:

Date: September 2026.

Building Ventures, Backing Innovation since 2014

Novarin Capital is a publicly quoted venture builder with more than 10 years of heritage in blockchain and digital assets.

The Company focuses on **Frontier Technologies**, building and investing across Agentic AI, Prediction Markets, Decentralised Finance and Trading & Liquidity Networks—markets positioned to benefit from **powerful long-term growth trends** driven by advances in artificial intelligence, blockchain and digital infrastructure.

Operating through our wholly owned **Gibraltar** subsidiary, Novarin Capital combines public market access with an established operational presence in one of the world's leading digital asset jurisdictions

How We Operate

An integrated venture building model connecting founders, capital, expertise and global market access to help build scalable frontier technology businesses.

VENTURE BUILDING & STRATEGIC PARTICIPATION

Working closely with founders to shape, structure and support ventures, alongside selective capital participation where aligned.

OPERATIONAL ACCELERATION & ADVISORY

Delivering structured accelerator programmes & advisory services, bringing together partners, sponsors and ecosystem participants within a commercially structured framework.

GLOBAL NETWORK & MARKET ACCESS

Providing access to Novarin Capital's global network of investors, operators, infrastructure providers and strategic collaborators.

Experienced Leadership

A proven leadership team with deep expertise across frontier technology, capital markets and corporate governance.

Leadership Team

Novarin Capital's Core Frontier Technology Focus

Where artificial intelligence (AI), blockchain and digital infrastructure converge, enabling new forms of digital commerce , economic activity and value creation — driving innovation, investment and the growth of scalable digital economies.

1. Agentic AI

Autonomous AI systems that can reason, make decisions and perform tasks independently, interacting with people, software and digital networks.

2. Prediction Markets

Markets that harness collective intelligence to forecast future outcomes across sports, politics, finance and other real-world events, creating valuable data and actionable insights

3. Decentralised Finance

Blockchain-powered financial services that enable lending, trading, payments and asset management without traditional intermediaries.

4. Trading and Liquidity Networks

Digital market infrastructure that enables the efficient trading, movement and exchange of digital assets across markets, as stablecoins emerge as a core settlement layer for the digital economy

The Emergence of the **Agentic Economy**

AI agents represent the next evolution of artificial intelligence—autonomous software capable of making decisions, performing tasks and participating directly in the digital economy.

The Scale of the **Opportunity**

\$30tn

Machine-to-machine economy by 2030
Estimated value of autonomous economic activity between AI agents. Gartner / a16z

\$17.5tn

Agentic commerce by 2030
Estimated value of AI-driven commercial activity. Deloitte

“AI is the **killer crypto app.”**

It's now obvious that AI agents are going to need money — and it's already happening.

— Marc Andreessen, co-founder, Andreessen Horowitz

INTELLIGENCE

AI agents can reason, plan, learn and make decisions autonomously to achieve defined objectives.

ACTION

They execute complex workflows, collaborate with other agents, use digital tools and increasingly transact without human intervention.

ECONOMIC IMPACT

As AI agents begin buying, selling and coordinating services autonomously, they create an entirely new machine-to-machine economy.

Why AI Agents Are Blockchain's Killer App

AI agents need more than intelligence—they need a native digital economy. Blockchain provides the infrastructure that enables autonomous identity, payments and trust at machine speed.

DIGITAL OWNERSHIP

Blockchain wallets give AI agents a native digital identity and the ability to own, receive and transfer digital assets autonomously.

AUTONOMOUS TRANSACTIONS

Smart contracts enable AI agents to transact directly with one another—paying for data, services and compute without human intervention.

TRUST AND VERIFICATION

Every transaction and decision can be securely recorded and verified, creating the trust needed for autonomous machine-to-machine commerce.

Without blockchain, AI agents can think. With blockchain, they can own, transact and participate **in the digital economy....**

Positioned for the Agentic Economy

**How Novarin Capital is building, backing
and participating across the Agentic AI ecosystem.**

Yellow Network: A strategic venture backed by Novarin Capital

Yellow Network is building a trustless clearing and settlement network designed for the emerging Agentic Economy.

Novarin Capital has supported Yellow Network since its 2022 seed funding, consistent with our long-standing approach of identifying high-potential technologies early in their commercial journey.

THE CHALLENGE

AI agents and digital asset markets require instant, trustless settlement, yet today's infrastructure remains fragmented, slow and reliant on intermediaries.

THE SOLUTION

Yellow enables trustless clearing and settlement across exchanges, blockchains and applications without relinquishing custody or requiring trusted intermediaries.

WHY IT MATTERS

Settlement infrastructure is a foundational layer of the Agentic Economy, enabling autonomous payments, trading and machine-to-machine commerce.

As AI agents become economic participants, **trustless settlement** becomes essential infrastructure

STRATEGIC PROGRESS

- ✓ Yellow Pro live
- ✓ YELLOW token launched
- ✓ Market trading established
- ✓ Discussions ongoing regarding broader strategic collaboration and venture-building

With Yellow Network now live and the YELLOW token launched, Novarin Capital is well positioned to participate in the network's long-term growth, benefit from potential token appreciation and capitalise on future strategic collaboration

Otomato: A strategic venture backed by Novarin Capital

Otomato is developing infrastructure for autonomous AI agents, enabling users to create and deploy intelligent agents capable of monitoring, deciding and executing on-chain and off-chain tasks without coding expertise.

PLATFORM

Portfolio-aware DeFi Intelligence

- Automatically monitors users' on-chain positions across multiple blockchains and protocols
- Delivers personal real-time alerts and actionable insights

STRATEGIC RELEVANCE

The Execution Layer of the Agentic Economy

- Enables AI agents to automate digital asset workflows and blockchain interactions
- 1,500+ identified use cases
- 10+ protocol integrations
- App launched on Appstore and Google Play April 2026

NOVARIN POSITION

Equity Holding

~1.25% of Dymint Labs Pte.* (*Otomato's software development entity)

Token Warrant

Rights to future protocol token allocation

Independent Validation

US\$2 million strategic investment from Improbable Worlds Ltd(December 2025)

Original Entry

US\$75k Simple Agreement for Future Tokens (July 2024)

Together with Yellow Network, Otomato provides Novarin Capital with exposure across the execution and settlement layers of the emerging *Agentic Economy*

Prediction Markets

Prediction Markets harness collective intelligence to generate real-time probabilities, creating actionable insights for people, businesses and increasingly autonomous AI systems.

WHAT THEY ARE

Markets where participants trade the probability of future real-world events, continuously updating the market's collective view as new information emerges:

- Elections
- Interest rates
- Economic data
- Sport

HOW THEY WORK

Participants buy and sell contracts priced between \$0 and \$1.

The market price represents the collective probability of the event occurring.

Winning contracts settle at \$1.
Losing contracts settle at \$0.

WHY THEY MATTER

Prediction markets transform dispersed information into machine-readable intelligence for forecasting, risk pricing, decision support and autonomous AI systems.

The convergence of **Artificial Intelligence**, digital assets and Prediction Markets is transforming how information is discovered, risk is priced and decisions are made across **Frontier Technology**

Prediction Markets

Prediction markets are rapidly evolving into a significant Frontier Technology sector, driven by growing adoption, regulatory progress and the convergence of artificial intelligence with digital assets.

FROM NICHE TO MAINSTREAM

Information discovery

- Risk pricing
- Decision support
- AI-driven applications
- Financial markets

MARKET VALIDATION

Polymarket - US\$15b*

Leading decentralised prediction market.

Kalshi - US\$22b**

Regulated US prediction market exchange.

Gibraltar

Europe's first jurisdiction to license a regulated Prediction Market operator marking an early step in the market's regulatory development

- 2026 estimated annual sector revenue: ~US\$2 billion
- 2030 industry forecasts: >US\$10 billion annual revenue and up to US\$1 trillion annual trading volume
- * Polymarket: Indicative US\$15bn fundraising valuation (Reuters, Apr 2026).
- ** Kalshi: US\$22bn Series F valuation (Forbes, May 2026).

Predictive Labs – Nijinn

Novarin Capital recognised the opportunity in prediction market infrastructure early, backing Predictive Labs as both an investor and strategic adviser. Predictive Labs has now unveiled Nijinn, its analytics platform for prediction markets, marking a significant development milestone

NIJINN PLATFORM

An analytics and discovery platform for Prediction Markets

Aggregates pricing, market rules and fee data from multiple prediction market venues into a single analytics interface. The platform provides analytics only and does not execute trades, custody assets or take positions.

A RAPIDLY EXPANDING MARKET

A New Layer of market infrastructure

Prediction markets are among the fastest-growing sectors in digital assets. As the sector scales, data aggregation and analytics infrastructure is emerging as a critical layer of the ecosystem.

NOVARIN POSITION

14.91% Equity Interest

- US\$450k invested in Predictive Labs Pte.
- Investment increased following successful delivery of agreed development milestones (24 August 26).
- Further investment rights to 29.85% ownership
- Strategic advisory engagement supporting commercial development

Predictive Labs exemplifies Novarin Capital's strategy of identifying and supporting emerging infrastructure businesses positioned at the forefront of **Frontier Technology.**

Forza!

Forza! is Novarin Capital's wholly owned Gibraltar subsidiary, providing a dedicated treasury platform that strengthens the Group's balance sheet while supporting disciplined long-term capital allocation.

Strategic Treasury Platform — Dedicated treasury vehicle responsible for managing the Group's strategic Bitcoin reserves, strengthening balance sheet resilience and supporting disciplined long-term capital allocation. Assets are secured through regulated institutional custodians.

Strategic Bitcoin Reserves — 182 BTC as at 14 July 2026 with an indicative market value of approximately US\$11.33 million*, providing financial resilience, balance sheet strength and long-term optionality (*Based on a Bitcoin price of US\$62,240 as at 14.07.26).

Strategic Capital Allocation — As announced on 14 July 2026, up to 15% of treasury value may be deployed under the Company's *Strategic Capital Allocation Framework* to support venture-building activities and selected investment opportunities.

Balance sheet strength provides the flexibility to advance venture-building through disciplined capital allocation

Frontier Technology. Asymmetric Potential. Compounding Philosophy.

A disciplined operating model focused on identifying Frontier Technology opportunities with asymmetric return potential, guided by a long-term philosophy of compounding returns through shifting market cycles.

WHEN MARKETS ARE STRONG

Realise and Reinforce

- Selective portfolio realisations
- Strengthen the balance sheet
- Raise capital on favourable terms

WHEN MARKETS ARE WEAKER

Build and Deploy

- Invest at more attractive valuations
- Expand venture-building and advisory activity
- Deploy treasury capital selectively

THE OPERATING ENGINE

Venture building, strategic advisory, disciplined investment and balance sheet strength combine to create a business designed to compound returns through shifting market cycles

Building Ventures, Backing Innovation.

Novarin Capital combines venture building, strategic investment, treasury strength and operational capability to participate across the digital asset economy through shifting market cycles.

AGENTIC AI AND PREDICTION MARKETS

Exposure across agentic AI, Prediction Markets, event-driven finance and digital asset infrastructure.

OPERATING MODEL

Venture building, advisory and strategic backing designed to operate through shifting market cycles.

BITCOIN BACKED TREASURY

Strategic Bitcoin Reserves held via Forza Gibraltar, providing balance sheet strength, resilience & long-term optionality

SECTOR HERITAGE

First blockchain company to IPO in London in 2015; active across digital assets for more than a decade.

GLOBAL NETWORK

A decade-built network of founders, investors, operators, infrastructure providers and strategic partners.

FORWARD FOCUS

Focused on emerging frontier technology sectors where blockchain, AI, data and digital assets converge to unlock major growth opportunities
